Contents of Volume 85

Number 1, 7 July 1980

EDITORIAL Short Articles on Unsolved Problems 1

WOOKEY, P. J., A Theory for the Coupling of Ultrastructural Transformations of Mitochondria to the Activity of Glycolysis . 3

ARMINSKI, L., WEINBAUM, S. and PFEFFER, R., Time Dependent Theory for Vesicular Transport across Vascular Endothelium . 13

BARDSLEY, W. G., WOOLFSON, R. and WOOD, R. M. W., Some Mathematical Results Concerning Hessians of Binding Polynomials and Co-operativity Coefficients 45

WHITE, R. A., A Theory for the Estimation of DNA Synthesis Rates by Flow Cytometry 53

BREWER, G. J., Exocytosis and Directed Movement of Cytoplasmic Vesicles Toward the Plasma Membrane 75

NAORA, H., DEACON, N. J. and BUCKLE, D., Further Studies on Similarity of Terminal Nucleotide Sequences of Eukaryote mRNA—A Possible Mechanism of RNA Splicing . . . 83

FRETER, R. R. and SAVAGEAU, M. A., Proofreading Systems of Multiple Stages for Improved Accuracy of Biological Discrimination 99

BASU, S., Theoretical Estimates of Cathodoluminescence of Giemsa Stained Chromosomes 125

SOLOWAY, A. H. and LEQUESNE, P. W., Potential Endogenous Mutagens/Carcinogens 153

LETTER TO THE EDITOR

CHAPMAN, J. B., On Current–Voltage Relations of Ionic Channels . 165

Number 2, 21 July 1980

TOTAFURNO, J., LUMSDEN, C. J. and TRAINOR, L. E. H., Structure and Function in Biological Hierarchies: An Ising Model Approach 171

TORNHEIM, K., Co-ordinate Control of Phosphofructokinase and Pyruvate Kinase by Fructose Diphosphate: A Mechanism for Amplification and Step Changes in the Regulation of Glycolysis in Liver 199

ULANOWICZ, R. E., An Hypothesis on the Development of Natural Communities 223

BARDSLEY, W. G., WOOLFSON, R. and MAZAT, J.-P., Relationships Between the Magnitude of Hill Plot Slopes, Apparent Binding Constants and Factorability of Binding Polynomials and their Hessians 247

NUSSINOV, R., Strong Adenine Clustering in Nucleotide Sequences . 285

ZINK, S., BECKEL, C. L. and LARSON, A. C., Study of Conformations of the Adenosine Phosphates. I: Adenosine Monophosphate (AMP) 293

ZINK, S., BECKEL, C. L. and LARSON, A. C., Study of Conformations of the Adenosine Phosphates. II: Adenosine Tri- and Disphosphate (ATP, ADP) 305

NEWMAN, W. I., Some Exact Solutions to a Non-linear Diffusion Problem in Population Genetics and Combustion . . . 325

CHEETHAM, A. H., HAYEK, L-A. C. and THOMSEN, E., Branching Structure in Arborescent Animals: Models of Relative Growth . 335

ISHAY, J. S., ATTIA, R., HOCHBERG, Y. and GOLDSTEIN (ASANTA), M., Photoresistivity of the Cuticle in the Gaster Segments in the Ant Species *Cataglyphis bicolor*, *Messor arenarius* and *Messor semirufus* 371

HAIGH, J. and ROSE, M. R., Evolutionary Game Auctions . . 381

Number 3, 7 August 1980

BRESCH, C., NIESERT, U. and HARNASCH, D., Hypercycles, Parasites and Packages 399

EIGEN, M., GARDINER, W. C. JR. and SCHUSTER, P., Hypercycles and Compartments. Compartments Assist—but do not replace—Hypercyclic Organization of Early Genetic Information . . 407

MARCHI, E. and HORAS, J., On Aspartate Transcarbamylase Kinetics 413

LEVITAN, E., Estimation of Ionic Channel Surface Density from Relaxational Ionic and Gating Currents 423

MEINHARDT, H. and GIERER, A., Generation and Regeneration of Sequence of Structures During Morphogenesis 429

HAYASHI, Y., Fluid-dynamical Study of Protoplasmic Streaming in a Plant Cell 451

HAYASHI, Y., Theoretical Study of Motive Force of Protoplasmic Streaming in a Plant Cell 469

HELLER, R., Foraging on Potentially Harmful Prey . . . 807

CONFERENCE ANNOUNCEMENT 815

Index to Volume 85

Adenine clustering, strong, in nucleotide sequences, 285
Adenosine phosphates, study of conformations of; adenosine monophosphate (AMP), 293
Adenosine phosphates, study of conformations of; adenosine tri- and disphosphates (ATP, ADP), 305
Aging (dissipative) systems, the metrical structure of, 745
Aminoacyl-tRNAs from mouse plasmacytomas, cluster analysis correlates chromatographic profiles with myeloma protein similarity, clonal origin of tumor lines, and the neoplastic nature of the tissues, 507
Animal behaviour, the application of statistical decision theory to, 673
Animal conflict, an evolutionary stable strategy for; being honest about one's intentions, 623
Animals, arborescent, branching structure in; models of relative growth, 335
Animals, sensitivity of bioenergetic growth models to changes in the energy balance parameters, 643
Ant species *Cataqlyphis bicolor, Messor arenarius* and *Messor semirufus*, photoresistivity of the cuticle in the gaster segments in, 371
Antibacterial agents, the derivation of theoretical resistance mechanisms to, 597
APPLE, M. S. and KOROSTYSHEVSKIY, M. A., Why many biological parameters are connected by power dependence, 569
Arborescent animals, branching structure in; models of relative growth, 335
ARMINSKI, L., WEINBAUM, S. and PFEFFER, R., Time dependent theory for vesicular transport across vascular endothelium, 13
Aspartate transcarbamylase kinetics, 413
ATTIA, R. (see ISHAY, J. S.), 371
Auctions, evolutionary game, 381

BARDSLEY, W. G., WOOLFSON, R. and MAZAT, J.-P., Relationships between the magnitude of hill plot slopes, apparent binding constants and factorability of binding polynomials and their hessians, 247
BARDSLEY, W. G., WOOLFSON, R. and WOOD, R. M. W., Some mathematical results concerning hessians of binding polynomials and co-operativity coefficients, 45
BARTHOLDI, P. (see JUNG, A.), 657
BASU, S., Theoretical estimates of cathodoluminescence of giemsa stained chromosomes, 125
BECKEL, C. L. (see ZINK, S.), 293, 305
Behaviour, animal, the application of statistical decision theory to, 673
BELLETT, A. J. D., Models for the replication of linear DNA must account for the completion of both molecular ends (letter), 549
Binding, ligand, reversible, to a multivalent macromolecule, computer simulations of the kinetics of; consequences of negative binding co-operativity associated with changes of the association and dissociation rate constants, 497

Binding polynomials and co-operativity coefficients, some mathematical results concerning hessians of, 45
Binding polynomials and their hessians, relationships between the magnitude of hill plot slopes, apparent binding constants and factorability of, 247
Bioenergetic growth models of animals, sensitivity to changes in the energy balance parameters, 643
Biological and artificial membranes, unidirectional fluxes in saturated single-file pores of; asymptotic behavior at high degree saturation, 575
Biological discrimination, proofreading systems of multiple stages for improved accuracy of, 99
Biological evolution, an application of information theory to, 789
Biological hierarchies, structure and function in; an ising model approach, 171
Biological parameters, why many of them are connected by power dependence, 569
Biological phenomena, fundamental, on cell-specific mitosis-inhibiting protein excretion hypothesis, a theoretical consideration of, 771
BRAMALL, L. (see MAJKOWSKI, J.), 643
Branching structure in arborescent animals: models of relative growth, 335
BRESCH, C., NIESERT, U. and HARNASCH, D., Hypercycles, parasites and packages, 399
BREWER, G. J., Exocytosis and directed movement of cytoplasmic vesicles toward the plasma membrane, 75
BUCKLE, D. (see NAORA, H.), 83

Carcinogens/mutagens, potential endogenous, 153
Cataqlyphis bicolor, *Messor arenarius* and *Messor semirufus*, ant species, photoresistivity of the cuticle in the gaster segments in, 371
Cathodoluminescence of giemsa stained chromosomes, theoretical estimates of, 125
Cell, plant, fiuid-dynamical study of protoplasmic streaming in, 451
Cell, plant, theoretical study of motive force of protoplasmic streaming in, 469
Cell-specific mitosis-inhibiting protein excretion hypothesis, a theoretical consideration of fundamental biological phenomena on, 771
Channel, ionic, estimation of surface density from relaxational ionic and gating currents, 423
Channels, ionic, on current–voltage relations of (letter), 165
CHAPMAN, J. B., Consistency between thermodynamics and the kinetics of *n*, *m* and *h* in the Hodgkin–Huxley equations, 487
CHAPMAN, J. B., On current-voltage relations of ionic channels (letter), 165
Charge separation, ion, electron and proton transport in photosynthetic membranes, a theory based on asymmetry of surface charges, 691
CHEETHAM, A. H., HAYEK, L-A. C. and THOMSEN, E., Branching structure in arborescent animals: models of relative growth, 335
Chemotaxis, microbial, in flowing water in the vicinity of a source of attractant or repellent, 543
Chromosomes, giemsa stained, theoretical estimates of cathodoluminescence of, 125
Cleavage process in embryogenesis, a field description of, 757
Cluster analysis of aminoacyl-tRNAs from mouse plasmacytomas correlates chromatographic profiles with myeloma protein similarity, clonal origin of tumor lines, and the neoplastic nature of the tissues, 507

Clustering, adenine, strong, in nucleotide sequences, 285
Coccid insect *Neosteingelia texana*, dislocations in microtubular bundles within spermatozoa of (letter), 561
COLEMAN, P. S. (see LAVIETES, B. B.), 523
Combustion, some exact solutions to a non-linear diffusion problem in population genetics and, 325
Communities, natural, an hypothesis on the development of, 223
Compartments and hypercycles. Compartments assist—but do not replace—hypercyclic organization of early genetic information, 407
Computer simulations of the kinetics of reversible ligand binding to a multivalent macromolecule. Consequences of negative binding co-operativity associated with changes of the association and dissociation rate constants, 497
Conflict, animal, an evolutionary stable strategy for; being honest about one's intentions, 623
Co-operativity, binding, negative, associated with changes of the association and dissociation rate constants, consequences of; computer simulations of the kinetics of reversible ligand binding to a multivalent macromolecule, 497
Co-operativity coefficients, some mathematical results concerning hessians of binding polynomials and, 45
CRUMPLIN, G. C., The derivation of theoretical resistance mechanisms to antibacterial agents, 597
Currents, relaxational ionic and gating, estimation of ionic channel surface density from, 423
Current-voltage relations of ionic channels (letter), 165
Cuticle in the gaster segment in the ant species *Cataglyphis bicolor*, *Messor arenarius* and *Messor semirufus*, photoresistivity of, 371
Cytometry, flow, a theory for the estimation of DNA synthesis rates by, 53
Cytoplasmic vesicles, exocytosis and directed movement toward the plasma membrane, 75

DALZIEL, K. (see KUCHEL, P. W.), 497
DEACON, N. J. (see NAORA, H.), 83
Decision theory, statistical, application to animal behaviour, 673
Differentiation, neoplastic, the role of lipid metabolism in, 523
Diffusion, non-linear, problem in population genetics and combustion, some exact solutions to, 325
Discrimination, biological, proofreading systems of multiple stages for improved accuracy of, 99
Dislocations in microtubular bundles within spermatozoa of the coccid insect *Neosteingelia texana* (letter), 561
DNA, linear, models for replication must account for the completion of both molecular ends (letter), 549
DNA synthesis rates, a theory for their estimation by flow cytometry, 53
DUNIEC, J. I. and THORNE, S. W., A theory of charge separation, ion, electron and proton transport in photosynthetic membranes based on asymmetry of surface charges, 691

EIGEN, M., GARDINER, W. C. JR. and SCHUSTER, P., Hypercycles and compartments. Compartments assist—but do not replace—hypercyclic organization of early genetic information, 407

Electron, proton and ion transport and charge separation in photosynthetic membranes, a theory based on asymmetry of surface charges, 691
Embryogenesis, a field description of the cleavage process in, 757
Endothelium, vascular, time dependent theory for vesicular transport across, 13
Energy balance parameters, sensitivity of bioenergetic growth models of animals to changes in, 643
Environmental noise, non-white, logistic growth in the presence of, 713
Enzyme inhibition, irreversible, kinetics of; the interpretation of the fractional enzyme activity vs. extent of protein modification plot (letter), 553
Eukaryote mRNA, further studies on similarity of terminal nucleotide sequences of; a possible mechanism of RNA splicing, 83
Evolution, biological, an application of information theory to, 789
Evolutionary game auctions, 381
Evolutionary stable strategy for animal conflicts; being honest about one's intentions, 623
Exocytosis and directed movement of cytoplasmic vesicles toward the plasma membrane, 75
Extracellular ion transport, 739

FERRIER, J. M., Extracellular ion transport, 739
Field description of the cleavage process in embryogenesis, 757
Flow cytometry, a theory for the estimation of DNA synthesis synthesis rates by, 53
Fluid-dynamical study of protoplasmic streaming in a plant cell, 451
Fluxes, unidirectional, in saturated single-file pores of biological and artificial membranes. II. Asymptotic behavior at high degree saturation, 575
Foraging on potentially harmful prey (letter), 807
FRETER, R. R. and SAVAGEAU, M. A., Proofreading systems of multiple stages for improved accuracy of biological discrimination, 99
Fructose diphosphate, co-ordinate control of phosphofructokinase and pyruvate kinase by; a mechanism for amplification and step changes in the regulation of glycolysis in liver, 199

Game auctions, evolutionary, 381
GARDINER, W. C. JR. (see EIGEN, M.), 407
Gaster segments in the ant species *Cataglyphis bicolor*, *Messor arenarius* and *Messor semirufus*, photoresistivity of the cuticle in, 371
Genetic information, early, compartments assist—but do not replace—hypercyclic organization of, 407
Genetics, population, and combustion, some exact solutions to a non-linear diffusion problem in, 325
Giemsa stained chromosomes, theoretical estimates of cathodoluminescence of, 125
GIERER, A. (see MEINHARDT, H.), 429
Glycolysis in liver, a mechanism for amplification and step changes in the regulation of; co-ordinate control of phosphofrucktokinase and pyruvate kinase by fructose diphosphate, 199
Glycolysis, a theory for the coupling of ultrastructural transformations of mitochondria to the activity of, 3
GOLDSTEIN (ASANTA), M. (see ISHAY, J. S.), 371

GOODWIN, B. C. and TRAINOR, L. E. H., A field description of the cleavage process in embryogenesis, 757
Growth, bioenergetic, models of animals, sensitivity to changes in the energy balance parameters, 643
Growth, logistic, in the presence of non-white environmental noise, 713

HAIGH, J. and ROSE, M. R., Evolutionary game auctions, 381
Hairpins, stable, MS2 RNA has a potential to form an unusually large number of, 481
HARNASCH, D. (see BRESCH, C.), 399
HAYASHI, Y., Fluid-dynamical study of protoplasmic streaming in a plant cell, 451
HAYASHI, Y., Theoretical study of motive force of protoplasmic streaming in a plant cell, 469
HAYEK, L-A. C. (see CHEETHAM, A. H.), 335
HECKMANN, K. (see KOHLER, H.-H.), 575
HELLER, R., Foraging on potentially harmful prey (letter), 807
Hessians of binding polynomials and co-operativity coefficients, some mathematical results concerning, 45
Hessians, relationships between the magnitude of hill plot slopes, apparent binding constants and factorability of binding polynomials and their, 247
Hierarchies, biological, structure and function in; an ising model approach, 171
Hill plot slope magnitudes, apparent binding constants and factorability of binding polynomials and their hessians, relationships between, 247
HOCHBERG, Y. (see ISHAY, J. S.), 371
Hodgkin–Huxley equations, consistency between thermodynamics and the kinetics of *n*, *m* and *h* in, 487
HORAS, J. (see MARCHI, E.), 413
HOUSTON, A. (see MCNAMARA, J.), 673
Hypercycles and compartments. Compartments assist—but do not replace—hypercyclic organization of early genetic information, 407
Hypercycles, parasites and packages, 399

Information theory, application to biological evolution, 789
Ion, electron and proton transport and charge separation in photosynthetic membranes, a theory based on asymmetry of surface charges, 691
Ion transport, extracellular, 739
Ionic channel surface density, estimation from relaxational ionic and gating currents, 423
Ionic channels, on current–voltage relations of (letter), 165
ISHAY, J. S., ATTIA, R., HOCHBERG, Y. and GOLDSTEIN (ASANTA), M., Photoresistivity of the cuticle in the gaster segments in the ant species *Cataglyphis bicolor*, *Messor arenarius* and *Messor semirufus*, 371
Ising model approach to structure and function in biological hierarchies, 171

JUNG, A. and BARTHOLDI, P., Turnover of multicompartment systems, 657

KOHLER, H.-H. and HECKMANN, K., Unidirectional fluxes in saturated single-file pores of biological and artificial membranes. II. Asymptotic behavior at high degree saturation, 575

NUSSINOV, R., SUSSMAN, J. L. and TRIFONOV, E. N., MS2 RNA has a potential to form an unusually large number of stable hairpins, 481

ONDA, H., A theoretical consideration of fundamental biological phenomena on cell-specific mitosis-inhibiting protein excretion hypothesis, 771

Packages, hypercycles and parasites, 399
Parasites, packages and hypercycles, 399
PFEFFER, R. (see ARMINSKI, L.), 13
Phosphofructokinase and pyruvate kinase, co-ordinate control by fructose diphosphate; a mechanism for amplification and step changes in the regulation of glycolysis in liver, 199
Photoresistivity of the cuticle in the gaster segments in the ant species *Cataqlyphis bicolor, Messor arenarius* and *Messor semirufus*, 371
Photosynthetic membranes, a theory of charge separation, ion, electron and proton transport based on asymmetry of surface charges, 691
Plant cell, fluid-dynamical study of protoplasmic streaming in, 451
Plant cell, theoretical study of motive force of protoplasmic streaming in, 469
Plasma membrane, exocytosis and directed movement of cytoplasmic vesicles toward, 75
Plasmacytomas, mouse, aminoacyl-tRNAs from; cluster analysis correlates chromatographic profiles with myeloma protein similarity, clonal origin of tumor lines, and the neoplastic nature of the tissues, 507
Population genetics and combustion, some exact solutions to a non-linear diffusion problem in, 325
Pores, saturated single-file, of biological and artificial membranes, unidirectional fluxes in; asymptotic behavior at high degree saturation, 575
Power dependence, why many biological parameters are connected by, 569
Prey, potentially harmful, foraging on (letter), 807
Proofreading systems of multiple stages for improved accuracy of biological discrimination, 99
Protein excretion, cell-specific mitosis-inhibiting, hypothesis, a theoretical consideration of fundamental biological phenomena on, 771
Protein modification plot, the interpretation of the fractional enzyme activity vs. extent of; kinetics of irreversible enzyme inhibition (letter), 553
Proton, electron and ion transport and charge separation in photosynthetic membranes, a theory based on asymmetry of surface charges, 691
Protoplasmic streaming in a plant cell, fluid-dynamical study of, 451
Protoplasmic streaming in a plant cell, theoretical study of motive force of, 469
Pryruvate kinase and phosphofructokinase, co-ordinate control by fructose diphosphate; a mechanism for amplification and step changes in the regulation of glycolysis in liver, 199

RAKITZIS, E. T., Kinetics of irreversible enzyme inhibition: the interpretation of the fractional enzyme activity vs. extent of protein modification plot (letter), 553
Relaxational ionic and gating currents, estimation of ionic channel surface density from, 423
Replication of linear DNA: models must account for the completion of both molecular ends (letter), 549
Resistance mechanisms, theoretical, to antibacterial agents, the derivation of, 597
RICHARDSON, I. W., The metrical structure of aging (dissipative) systems, 745
RNA, MS2, has a potential to form an unusually large number of stable hairpins, 481

RNA splicing, a possible mechanism of; further studies on similarity of terminal nucleotide sequences of eukaryote mRNA, 83
ROSE, M. R. (see HAIGH, J.), 381

SAVAGEAU, M. A. (see FRETER, R. R.), 99
SCHUSTER, P. (see EIGEN, M.), 407
Sequence of structures during morphogenesis, generation and regeneration of, 429
Sequences of nucleotides, strong adenine clustering in, 285
SOLOWAY, A. H. and LEQUESNE, P. W., Potential endogenous mutagens/carcinogens, 153
Spermatozoa of the coccid insect *Neosteingelia texana*, dislocations in microtubular bundles within (letter), 561
Splicing of RNA, a possible mechanism of; further studies on similarity of terminal nucleotide sequences of eukaryote mRNA, 83
SPRACKLING, M. T. and TWIGG, J., Dislocations in microtubular bundles within spermatozoa of the coccid insect *Neosteingelia texana* (letter), 561
STREBEL, D. E., Logistic growth in the presence of non-white environmental noise, 713
Structure and function in biological hierarchies: an ising model approach, 171
SUSSMAN, J. L. (see NUSSINOV, R.), 481

TANAKA, M., An application of information theory to biological evolution, 789
Thermodynamics and the kinetics of *n*, *m* and *h* in the Hodgkin–Huxley equations, consistency between, 487
THOMSEN, E. (see CHEETHAM, A. H.), 335
THORNE, S. W. (see DUNIEC, J. T.), 691
Time dependent theory for vesicular transport across vascular endothelium, 13
TORNHEIM, K., Co-ordinate control of phosphofrucktokinase and pyruvate kinase by fructose diphosphate: a mechanism for amplification and step changes in the regulation of glycolysis in liver, 199
TOTAFURNO, J., LUMSDEN, C. J. and TRAINOR, L. E. H., Structure and function in biological hierarchies: an ising model approach, 171
TRAINOR, L. E. H. (see GOODWIN, B. C.), 757
TRAINOR, L. E. H. (see TOTAFURNO, J.), 171
Transport, ion, electron and proton, and charge separation in photosynthetic membranes, a theory based on asymmetry of surface charges, 691
Transport of ions, extracellular, 739
Transport, vesicular, across vascular endothelium, time dependent theory for, 13
TRIFONOV, E. N. (see NUSSINOV, R.), 481
Turnover of multicompartment systems, 657
TWIGG, J. (see SPRACKLING, M. T.), 561

ULANOWICZ, R. E., An hypothesis on the development of natural communities, 223
Ultrastructural transformations of mitochondria, a theory for their coupling to the activity of glycolysis, 3

VAN RHIJN, J. G. and VODEGEL, R., Being honest about one's intentions: an evolutionary stable strategy for animal conflicts, 623

Vascular endothelium, time dependent theory for vesicular transport across, 13
Vesicles, cytoplasmic, exocytosis and directed movement toward the plasma membrane, 75
Vesicular transport across vascular endothelium, time dependent theory for, 13
VODEGEL, R. (see VAN RHIJN, J. G.), 623

Water, flowing, microbial chemotaxis in the vicinity of a source of attractant or repellent, 543
WEINBAUM, S. (see ARMINSKI, L.), 13
WHITE, R. A., A theory for the estimation of DNA synthesis rates by flow cytometry, 53
WOOD, R. M. W. (see BARDSLEY, W. G.), 45
WOOKEY, P. J., A theory for the coupling of ultrastructural transformations of mitochondria to the activity of glycolysis, 3
WOOLFSON, R. (see BARDSLEY, W. G.), 45, 247

ZINK, S., BECKEL, C. L. and LARSON, A. C., Study of conformations of the adenosine phosphates. I. Adenosine monophosphate (AMP), 293
ZINK, S., BECKEL, C. L. and LARSON, A. C., Study of conformations of the adenosine phosphates. II. Adenosine tri- and disphosphate (ATP, ADP), 305
